6. Description of content: Regulation (EU) 1369/2017 requires the rescaling of the energy label for space and water heaters. The draft updates and rescales the label from the previous A+++/A++/A+ classes to a more straightforward A to G scale. New icons and features are added to the energy label, a QR code that link to the European Product Registry for Energy Labelling (EPREL), an icon for energy-smart appliances, an icon for heat pumps using a Fgas free refrigerant and icons to indicate whether the products is also supplying water heating and/or cooling functions. The draft Regulation clarifies the rights

	and obligations of dealers, including installers acting as dealers, in relation to energy labelling.
<p>7. Objective and rationale, including the nature of urgent problems where applicable: The revised Energy Labelling Regulation, aligned with ecodesign requirements, is crucial for advancing the European Green Deal and promoting a circular economy. It aims to address existing issues in energy labelling, such as outdated energy efficiency classes and an inadequate framework for new technologies like heat pumps and hybrid systems. By updating the labels to a scale from A to G, incorporating new features like QR codes and Fgas free refrigerant indicators, and improving test methods, the regulation will enhance consumer awareness and encourage the adoption of efficient, renewable energy solutions. This revision supports the EU's goals of energy efficiency, sustainability, and reduced dependence on imported energy.; Consumer information, labelling</p>
