

ICS codes for TBT notice

This document identifies the ICS codes for standards referred to in the Electricity (Safety) Regulations and Gas (Safety and Measurement) Regulations, as amended in November 2025, in order to fulfil TBT obligations.

The primary sources for these codes are the respective online standards catalogue or web page for that standard.

Where the ICS code could not be identified in this way, an assessment was made with reference to ISO's International Classification for Standards (ICS) publication: [ISO - International Classification for Standards \(ICS\)](#). These assessments are highlighted.

There is some overlap in the ICS codes which gives rise to differences in how the codes are interpreted and applied. This exercise has taken the published ICS code. However, for a small number of entries the published ICS code does not appear to be consistent with the definition. These are also identified and an alternative suggested.
