

DRAFT COMMUNIQUÉ ON AMENDING THE COMMUNIQUÉ (DGI-2026/...) ON ECODESIGN REQUIREMENTS REGARDING ELECTRICAL ENERGY CONSUMPTION OF STANDBY, OFF AND NETWORK-CONNECTED STANDBY MODES OF HOUSEHOLD AND OFFICE TYPE ELECTRICAL-ELECTRONIC DEVICES (2023/826/EU) (DGI-2024/5)

ARTICLE 1- The phrase “based on the Regulation” in the first paragraph of Article 9 of the Communiqué on Ecodesign Requirements Regarding Electricity Energy Consumption in Standby, Off and Networked Standby Modes of Household and Office Type Electrical-Electronic Devices (2023/826/EU) (DGI-2024/5), published in the Official Gazette dated 5/1/2025 and numbered 32773, has been changed to “based on the Regulation and Regulation (EU) 2025/2262 amending this Regulation”.

ARTICLE 2 - Point 18 in Annex I of the same Communiqué has been amended as follows, and Point 23 has been added after Point 22.

“18. “Motor-operated building element” means opening or comfort equipment for use in buildings or related structures, excluding ventilation equipment, that can move or rotate, or both, by using input from the mains power source. The motor-operated building element incorporates an electric motor or an actuator and a control unit, and is operated by the end-user through cabled and/or wireless control(s), via a network, or controlled automatically with the use of sensors;”

“23. “Control unit” means a unit that receives signals from the end-user through cabled and/or wireless control(s), via a network, or from sensors, and enables the required operation of the motor or actuator of the motor-operated building element. Sensors connected to the unit and receiving power from the same mains input point as the rest of motor-operated building element are considered part of the control unit;”

ARTICLE 3 - Subparagraph (ğ) of Article 1 in Annex II of the same Communiqué has been amended as follows:

‘ğ) grinders used in the kitchen for the processing of food;’

ARTICLE 4 – The following sentence has been added after the first sentence in Annex IV of the same Communiqué, the first sentence in subparagraph (c) has been amended as follows, and subparagraph (d) has been repealed.

“For all types of household coffee machines, the measurement shall be performed after completion of the last brewing cycle, or, where applicable, after completion of a descaling process, a self-cleaning process or any operation performed by the user, unless an alarm has been triggered requiring user intervention to prevent any possible damage or accident.”

“The following procedure shall be used for measuring energy consumption in networked standby for the energy efficiency requirements of Annex III point 1(c), and for testing the power management function:”

ARTICLE 5 - This Communiqué enters into force on the date of its publication.

ARTICLE 6 - The Minister of Industry and Technology shall execute the provisions of this Communiqué.
